Crystal Beach Road Houses Mid to late
19th century

The five frame houses on the north side of Crystal Beach Road between Pinewood Road and Cabin Johns Road are very typical two story three bay by one room frame structures with an ell, T or shed kitchen to the back. The houses are not far from Earleville and were probably built along the road with such a close proximity to ^{REYBOLD'S WHARF} ~~the wharf~~ at the west end of POND NECK ROAD.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

On the north side of Crystal Beach Road between Pinewood Road and Cabin Johns Road are five two story, one two, or three bay by one room structures of mid to late 19th century date. They all face south with an east/west gable orientation.

Glen Echo, the eastern most structure CE-935 A has been extensively remodeled and added on to, according to the present owner the original structure is log and has been covered by successive additions. The interior has been remodeled and no evidence of log construction could be seen. The structure rests on an uncoursed stone foundation and is sheathed with asbestos siding. The roof has medium slope and is covered with composition tile. A central stack rises out of the main block. That appears on the 1877 Lake, Griffing, and Stevenson Atlas under Mrs. S. Yarrington. The structure retains no architectural significance outside the fact it may be log and does appear in 1877.

The Chickadel House (CE-935 B) is a 1½ story one bay by one room frame house with a single story shed addition off the east and north sides.

Aluminum siding partially covers the weatherboard siding. A tin sheathing partially covers the shingle roof. A brick stove stack rises out of the east gable end. Window sash and doors have been covered over and changed on the south side. An early 6/3 sash is found on the second floor of the north side. The main block measures 14' across by 12' deep with a 10' shed addition to the east.

A small winder stair with beaded board door is found in the northeast corner and adjacent to the stove stack. The rest of the interior has been covered over with paneling.

Three more frame houses (CE-935 C, D, E) of similar appearance are found further west. Each has an extension to the north and a porch across the main facade. Each have fieldstone foundations and either asbestos or aluminum siding. Interior end stuccoed stove stacks protrude out of each end or just one.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The houses are not architecturally significant and were only surveyed for inventory purposes. They all date from the third or fourth quarter of the 19th century.

The Chickadel House (CE-935 B) on the other hand is a significant structure probably belonging to a free black resident. It may have once been associated with the large farm to the south of Crystal Beach Road, as a tenant house.
